

FASHION STUDIES

(A NEW HORIZON)

Today the youth is focused and fortunate to have excellent choices in new and upcoming fields

that encourage individual talent for a bright future. Fashion design is one such option. Fashion is dynamic and ever changing . It influences our lifestyles e.g. the clothes we wear, the music we listen, the food we eat, the car we drive or the places we choose to go for holidays.

Fashion is a big business and key driver for several industries be it apparel accessories, textiles, automobiles or lifestyle product. This has widely expanded the scope for professional Fashion Designers. Fashion Design as a profession includes the entire process of designing and producing fashion apparels from the fibre and yarn stage to the finished product.

Realizing the wide scope of Fashion Design as a professional career, the school has introduced fashion studies at the 10 + 2 level , with the aim of introducing the students to the world of fashion through the fundamentals of fashion design. The course gives an overview of fashion and elaborate on different aspects like elements of design, history of fashion ,fabrics, understanding of the body, pattern development and garment construction.

The school has a fully equipped Fashion Studies lab to impart the above mentioned knowledge to students. Students are also given exposure through field trips, market surveys, workshops and in inter and intra school competitions. Students are also given hands on experience in pattern development, cutting and sewing. Our students have been showing excellent performances in class xii board exams in the subject and have been selected in the professional colleges like NIFT, PEARL, NIFD, IAM AND JIIMS.
